

**BOYS & GIRLS CLUBS
OF MAGIC VALLEY**

Club Families,

We are receiving many questions from our stakeholders regarding the Boys & Girls Clubs of Magic Valley's response plan to COVID-19. We have been actively monitoring the situation for two weeks and have worked on a contingency plan in preparation of our community being impacted by the outbreak. Our first course of action was creating a response plan as it relates to a school or Club closure in case of a confirmed diagnosis of COVID-19. As of now, we have shifted our focus to creating a response plan as it relates to school closures to slow and reduce disease transmission.

Serving young people who need us most has been the foundation of our work for many years. Right now, this looks different in our community. In this season focused on flattening the transmission curve, we must adapt our focus to meet the needs and expectations of our community.

At this time, we have modified our services to focus on providing emergency childcare to support first responders, healthcare workers, essential community personnel, and those parents who must work to maintain employment. **It is crucial that, if at all possible, kids stay home during this time in keeping with public safety standards. If this is a possibility, please keep your child home. The Club will be open from 6:45am-6:30pm.**

We respectfully ask families to utilize our service **ONLY IN CASE OF NECESSITY**, as we will have a limited number of spaces available. The Club will be open to the first 125 club members that enroll for Club days online. K-Netic kids who are paying the monthly fee do not need sign up online. As of now, the Club will remain open for the week of March 16-20th. This may change based upon recommendations of South Central District Health, the CDC and our board of directors.

Attached is our organizational safety and health plan. Please read carefully. We will be monitoring our staff and members regularly and will dedicate staff members to clean high traffic surfaces frequently.

Please do not send your child to the Club if they show any of the following symptoms: fever, cough, and shortness of breath. If Club members have these symptoms, they will be isolated and parents will be contacted immediately.

In Service to Youth,

Lindsey Westburg
Executive Director
